DETAILED ACTION

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Akimoto et al. (EP 0291073).

Akimoto et al. disclose a cement additive comprising a copolymer of a polyoxyalkylene compound represented by the following formula (1) and maleic anhydride; a hydrolyzed product of the copolymer; or a salt of the hydrolyzed product (claim 1, Sample 4 in Table 1).

The limitations of claims 2, 8, 10, and 12 can be found in Akimoto et al. at Sample 4 in Table 1, where it discloses the following chemical structure.

The limitations of claims 3 and 11 can be found in Akimoto et al. at Sample 11 in Table 1, where it discloses the acrylic acid.

The limitations of claim 4 can be found in Akimoto et al. at col. 5, lines 19-20, where it discloses the number average molecular weight from 1,000 to 200,000, which reads on the weight average molecular weight of 1,000 to 100,000.

The limitations of claims 5 and 9 can be found in Akimoto et al. at Samples 4 and 5 in Table 1, where it discloses the methacrylic acid.

The limitations of claim 6 can be found in Akimoto et al. at Claim 1, where it discloses the cement.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 13-15 are rejected under 35 U.S.C. 103(a) as obvious over Akimoto et al. (EP 0291073) in view of Spindler et al. (US 20050143543).

The disclosure of Akimoto et al. is adequately set forth in paragraph 3 and is incorporated herein by reference.

However, Akimoto et al. are silent on the use of the cement additive in the gypsum.

Spindler et al. disclose water-soluble copolymers based on vinyl ethers and/or allyl ethers and/or bisacryl derivatives to be used in building material systems such as gypsum for water retention (abstract, [0091]). In light of such benefit, it would have been obvious to one of ordinary skill in the art at the time the invention was made to add the water-soluble copolymer in the gypsum with the expected success.
